PRODUCT NOTIFICATION FOR WOLVERINE CUSTOMERS

19 August 2011

Dear Valued Customer,

We would like to inform you of some exciting news regarding an upcoming public announcement for a brand new ATEX Zone 2 rated computer – the Wolverine III. This new platform incorporates GE Intelligent Platform's COM Express technology to provide increased levels of performance, reliability and functionality in harsh environments. The Wolverine III is currently going through certification and is planned for production availability at the end of October 2011. More details can be obtained on this product under NDA pending public release by contacting your sales representative.

Knowing that we have a large customer base using the current generation Wolverine II product, we have kept the external mounting locations the same for Wolverine III so that installing the new product in existing locations will be extremely easy. We have also expanded the I/O offerings so that no connections were removed – only new features added. Transitioning to our newest product offering is therefore seamless, and affords significant opportunity for operational improvement.

With this announcement, we are also issuing an End of Life (EOL) notice for the Wolverine, Wolverine II, and Wolverine II with IS Barriers products. This notification affects all product variants from the Wolverine, Wolverine II, and Wolverine II with IS Barriers products. This EOL announcement is necessary due to Last Time Buy (LTB) announcements on several components.

Due to the high volume run of this product, CDI has secured a large quantity of LTB components and will continue to produce the Wolverine products as long as possible and will hold in reserve sufficient quantity to cover repairs of the product safely through the two year warranty period after the last product has been shipped.

Additionally, we will be offering a 5% discount on all orders of the Wolverine, Wolverine II and Wolverine II with IS Barrier products scheduled to be delivered by September 30, 2011. We will honor all orders on a first come first served basis, and our final date for accepting orders will be December 31, 2011 (with final ship dates scheduled through March 23, 2012). Our team of expert sales and service professionals are available to assist you with your product planning needs during this time, and we will make every effort to meet requested ship dates and standard lead times on these products.

We look forward to sharing the performance and reliability enhancements the new Wolverine III product with you. Please stay tuned for more information as we bring this exciting new product to market.

Sincerely,

Your Computer Dynamics Sales and Support Team
